

Oregon State University College of Science Graduation Checklist

B.S. in BioHealth Sciences, Pre-Pharmacy Option 2016-17

The following pre-pharmacy curriculum satisfies the prerequisite requirements of **most** accredited pharmacy schools in the United States. Because the prerequisite courses required for admission to the schools and colleges of pharmacy vary, **students** are ultimately responsible for completion of requirements to their choice of schools. Satisfactory completion of the courses recommended below **does not guarantee admission** to pharmacy school since applicants are accepted on a competitive basis. Refer to individual pharmacy schools for minimum accepted grades, minimum GPAs, and repeat course policies. Completing the prerequisite courses for pharmacy school usually requires 3-4 years of undergraduate study. Finishing a bachelor's degree, which usually takes four years, may make you more competitive for admission. Some pharmacy schools require a bachelor's degree. Pharmacy programs award the Doctor of Pharmacy (Pharm.D.) degree and generally consist of four years of professional study.

BACCALAUREATE CORE REQUIREMENTS:

Skills Courses (15 credits + WIC):

- | | |
|--|------------------------|
| <input type="checkbox"/> Writing 121 (3) ¹ | <u>WR 121</u> |
| <input type="checkbox"/> Writing II (3) ¹ | _____ |

Additional Prerequisites for Other PharmD Programs:

PACIFIC UNIVERSITY: Oregon's other pharmacy school, Pacific University, has slightly different prerequisite requirements. Students planning to apply to Pacific may need to take additional English, Speech, Psychology, Social/Behavioral Sciences, and/or Humanities/Fine Arts. See www.pacificu.edu/pharmd for more details.

OTHER PHARMACY SCHOOLS: Each of the 130+ pharmacy schools in the U.S. has its own prerequisites. Many schools also require applicants to take the Pharmacy College Admission Test (PCAT). Students must check with any school to which they wish to apply for up-to-date information.

1. WR 121, COMM, and MTH must be completed satisfactorily (C-) within their first 45 hours of OSU work. WR II must be completed satisfactorily within the first 90 hours. Transfer students must complete WR II and COMM within their first 45 hours at OSU.
2. The Biochemistry series is a prerequisite for OSU's PharmD program.
3. A minor in Chemistry is possible with one additional non-organic chemistry class such as CH 324, Quantitative Analysis (4cr.) or CH 390, Environmental Chemistry (3cr.).
4. Instead of BioHealth Sciences, a departmental major may be completed in any department in the College of Science. Excellent choices for pre-pharmacy students include Biology, Chemistry, and Microbiology. Additional upper division science courses are required for these majors.
