

## JAMES M CRAIG MEMORIAL LECTURE

### Dr. James M. Craig 1916-1985

Dr. James Morrison Craig was an excellent scientist, devoted to teaching and research in microbiology. He was recognized internationally for his work in botulism and his many contributions to applied microbiology. He is affectionately remembered by his colleagues and many students whose lives he touched. He received his education at San Jose State, Stanford, and Oregon State University. He was a Professor of Microbiology at San Jose State from 1948 until the time of his death.

Because of Dr. Craig's strong ties to Oregon State University, his wife, Reva, and sons, Leland (DDS, Manhattan Beach, California) and Morrie (Ph.D., Professor of Veterinary Medicine, OSU), established the James M. Craig Memorial Lectureship. Scientists whose applied microbiology research focuses in areas similar to those pursued by Dr. Craig are invited to speak.

### Former Speakers

- 1987 Mel W. Eklund, National Marine Fisheries Service, Seattle, WA
- 1988 Leroy E. Hood, California Institute of Technology, Pasadena, CA
- 1989 Flossie Wong-Staal, National Cancer Institute, Bethesda, MD
- 1990 Michael P. Doyle, University of Wisconsin, Madison, WI
- 1991 J. Michael Bishop, University of California, San Francisco, CA
- 1992 Norman Pace, Indiana University, Bloomington, IN
- 1993 Bernard N. Fields, Harvard Medical School, Boston, MA
- 1996 James M. Tiedje, Michigan State University, East Lansing, MI
- 1997 Todd R. Klaenhammer, North Carolina State University, Raleigh, NC
- 2001 Jay Levy, Research Institute University of California, San Francisco, CA
- 2004 Dr. Walter E. Stamm, University of Washington School of Medicine, Seattle
- 2006 Dr. Michael Wagner, Vienna Ecology Centre, University of Vienna, Austria
- 2007 Dr. Vivek Kapur, Director, Biomedical Genomics Center, University of Minnesota Medical School
- 2008 Dr. Rod Mackie, Department of Animal Sciences and Division of Nutritional Sciences, Univ of Illinois
